

"I use everything I know in integrative medicine to rehabilitate you."

-Dr. Young King Liu

TRADITIONAL CHINESE MEDICINE

Traditional Chinese Medicine, using electroacupuncture and herbal medicine, to treat acute and chronic diseases, is administered by Master Acupuncturist and biomedicine research expert, Dr. Young King Liu.

WHAT IS ACUPUNCTURE?

Acupuncture is an ancient Chinese method of treating patients by inserting thin, solid needles into acupuncture points. Stimulating these points either manually or electrically, can correct imbalances in the flow of "xue" (blood) "qi" (breath) [oxygenated blood?] or life force. A system of "meridians" covering the human body serves to locate these therapeutic acupuncture points.

Current research has shown that electroacupuncture is effective for the treatment of pain and many other common and difficult diseases. It is cost-effective when compared to the cost of many prescription drugs and/or surgery commonly used to alleviate these diseases. Acupuncture treatments are potentiated by the additions of herbal medicine.

THE UNIVERSITY OF NORTHERN CALIFORNIA COMMUNITY CLINIC IS PROMOTING DISEASE PREVENTION & TREATMENT USING ELECTRO-ACUPUNCTURE AND HERBAL MEDICINE

- Dr. Liu has 40+ years of clinical and research experience.
- Integrative treatment based on classical therapeutics and recent clinical trials.
- Proven safe and effective in many diseases.
- Therapy boosted by herbal medicines and over the counter (OTC) supplements.
